

## Universal AC Outlet • Compatibility Guide

Extron products using the Universal AC Outlet allow a number of different AC plugs to be used with HSA and Cable Cubby® devices. See the table on this card to determine if your plug type is compatible with the Universal AC Outlet.

- WARNINGS:**
- Before use, ensure that the device meets all regulatory requirements for your region and complies with all applicable local safety and electrical codes and standards. It is the responsibility of the installer to ensure the requirements stated above have been met.
  - Installation and service must be provided by authorized personnel only.
  - Devices may require grounding. Use caution with plugs that do not allow grounding (see table) when used with the Universal AC Outlet.
